

Nurturing Students for Enriched Lives

Principal Wan Ka Fai

In the current academic year, Po Leung Kuk Yao Ling Sun College has made significant progress in areas such as “Learning and Teaching”, “Whole-person Development”, and “Professional Development”. The school upholds a campus culture rooted in simplicity and compassion, where the teaching team not only demonstrates great enthusiasm for their craft but also wholeheartedly nurtures the students. The students, in turn, exhibit their talents and flourish in moral, intellectual, physical, social, and aesthetic dimensions, obtaining numerous awards. Throughout the various sections of this school newsletter, one can bear witness to the continuous progress and relentless optimization of Po Leung Kuk Yao Ling Sun Secondary School. We stand united with parents, walking alongside students, working together to build a fulfilling life for our students and guiding them toward progress and success.

“Promoting Continuous Teaching Improvement”

In terms of curriculum development, we promote holistic learning within interdisciplinary groups. Beginning this year, we have enlisted the expertise of a team from the Education University of Hong Kong’s “Educational Innovation Leadership Program” to collaborate with our teachers in designing cross-subject learning activities. Through the power of cross-subject collaboration, we aim to enhance students’ learning outcomes. Even in the early stages of this project, our school has injected a fresh wave of innovation, and we eagerly anticipate sharing more fruitful teaching and research results with you in the future.

Moreover, we are committed to fostering “excellent curriculum design” for each subject. This academic year, our teaching team has diligently focused on updating curriculum design to ensure effective instruction and meaningful learning experiences for our students. The emphasis on “excellent curriculum design” lies in effectively addressing the diverse learning needs of students. Teachers from all subjects are encouraged to actively participate, and the design outcomes will be subjected to comprehensive evaluation by the academic affairs team. This approach not only promotes the professional growth of our educators but also cultivates a vibrant atmosphere of lesson research within the school.

“Nurturing Students for Enriched Lives”

Every child is truly unique and exceptional. Our school places great importance on Life Education, striving to facilitate holistic growth in our students. We actively engage in various activities and competitions throughout Hong Kong, earning numerous awards. This year, our student Yu Jinsheng was selected as one of the “Outstanding Students in the New Territories”, serving as a role model for our school and encouraging more exceptional students to explore their talents across diverse domains. In STEAM activities, our students participated in the “Hong Kong Secondary School Students Creative Competition 2023 - Youth Luban Selection” and were honored with the “Junior Luban Creative Award”. They have also excelled in English activities. Our Form 5 students meticulously produced videos for the “24th Lions Clubs International Youth Exchange Video Competition” and have been shortlisted for the finals.

Our school places great emphasis on nurturing our students’ development in the realms of music, sports, and art, and the results have been exceptional. For instance, our handball team emerged victorious in the Tsuen Wan and Islands District Inter-school Handball Competition. Additionally, our Form 1 students won the Men’s Group B championship in the Hong Kong Inter-school Judo Championships. In the inter-school track and field competition, our students secured first place in the 800 meters and 1500 meters events. Furthermore, our Men’s Group A badminton team achieved third runner up in the Tsuen Wan & Islands District School Badminton Competition. On this note, I express my sincere gratitude to every teacher and student for their dedication, which has brought honor and awards to our school. Yet, what is truly remarkable is the establishment of deep connections and the touch of every life within the cherished bond between teachers and students.

Lastly, our school deeply values the collaboration between home and school. The “Star Parent Course” launched this year has been well-received, covering a wide range of topics aimed at enhancing parent-child relationships through theory and practice. Our experienced tutors engage in interactive sessions with parents, providing guidance and support amidst their busy family schedules. We encourage you to stay engaged, optimistic, and look forward to your continued active participation.
